

# Excavation

## Excavation

We have our own excavation team, which works year-round preparing ready-to-build pad sites. This gives Mericle a great inventory of sites that have already been planned, permitted, subdivided, cleared and graded. Our heavy equipment operators have many years of experience working with the land in Northeastern Pennsylvania and will help you meet your fast-track construction schedule.

Click on the following images to get a better look at just some of the state-of-the-art construction and excavation equipment we own...
